

# VIPER Central: How to Add a Xeno Nitro DVR

## VISTA KN©WLEDGE BASE

## INTRODUCTION

This guide provides details how to add a Xeno Nitro DVR [XHDAR & XHDART Units only] v2.0.1.47 or above of Viper-Central is required.

- Features Supported
  - o Live
  - o PTZ
  - o Playback
  - o Search [Calendar / Timeline
  - o Backup / Export Footage
  - Not Supported
    - o Search Preview
    - o Thumbnails
    - o Step Playback (step forward/backward)

#### How to find IP Address of Nitro DVR

Log-in to Nitro locally to get the IP Address

### Log-in to Viper Central Software

- Double click on the Application short cut. [This will normally be on the Desktop] If not select via the Windows Programs Tree.
- Or "Start > All Programs > VIPER-Central > VIPER-Central "
- Log-in pop-up will be displayed.
- Enter Login ID and Password then left click "Log-in" button. { Note: System Preference and Set up depends on the Log-in User's Authority }

#### Enter Setup Menu

• Move mouse to top left corner left click VIPER icon.

- Then left click "Setup"
- Then left click "+Add Device"

Logout Lock	Setup	- x
Setup	🚟 Devices 🙎 User 🌲 Event 🖷 Backup	
Preference	Group List + 🖉 â Search	Q Q. Device Search + Add Device & Device Modify 🔒 Delete
About		
Exit		

- Select Device Type "Recorder Type D"
- Enter Name IP Address and Login Details of DVR.
- Once done click on "OK" then click on "Save"

Add Device		×
	Recorder	
	Recorder	
	IP Camera	
	Recorder Type A	
	Recorder Type B	
Https Port	Recorder Type 🤉	

• Menu set up will close Device will appear in Device tree on left hand side.

🔺 🚥 nitro 8				
ॖ	Cam 01			
ॖ	Cam 02			
∎	Cam 03			
ॖ	Cam 04			
ॖ	Cam 05		~	
ॖ	Cam 06			
ॖ	Cam 07			
∎	Cam 08			

You can now view and playback etc from the DVR, refer to Viper Central manual for more details.

This completes the guide.
