Vista PVM10CAMx How to add Logo's & Initial set-up

INTRODUCTION

This document will describe the process how to set initial Config and uploading Logos on the PVM10CAMN monitor.

To be able to add/change the Logos and settings, you must be able to access the monitor's web page.

IP Address setting

Please download "Device Finder", this program detects and discovers any PVM10CAMx Monitor on the network and allows simple IP address setting as well as simple access to the monitors web page. PVMCAM Device Finder can be found on following link:

https://drive.google.com/drive/folders/1JmTY-LuVgRf1xYy0BhWnSfXW35yMYpga

Device Finder will identify any PVMCAM on the network and shows it IP address. [Fig 1]

The PVM10CAMx monitors are set to DHCP, so will be allocated a DHCP address if this facility is available on the network, if need to change the Network setting this can be done by selecting the required monitor enter "Username & Password" [admin / admin] then select "Settings" here you can "Adjust the Network Settings" [*Fig 2*]

If there is no DHCP service on the network, the units will default to address 192.168.30.220. To change the address, use the above procedure. (Note: the Laptop/PC must be in the same Network segment: 192.168.30.....)

Changing Logos

The PVM10CAMx monitor is set as default to be installed in Portrait mode with the camera on the left-hand side of the monitor with a Vista Logo preloaded.

This logo can be changed to display any logo or image. This new logo or image needs to be a Jpeg image of resolution 1080 x 1920 Portrait or 1920 x 1080 Landscape. [File size should be smaller than 1.5MB]

(Note: Vista can assist with creating new logo files)

Once the IP address of the monitor is set, Under Device Info is the URL to browse to the Web Interface.

Device Info IP: 192.168.0.130 Web Port: 80 Model Name: PVM10CAMN S/N: ABPVM2106230003	Windows Security X iexplore The server 192.168.0.130 is asking for your username and password.	Marcane from webnane X
Zero-Jonng II: 109.254.170.199 Frimware Version: 0.99.99.813 Friendly Name: PVM10CAMN(192.168.0.130) Manufacturer PVM-VISTA Manufacturer IVI: http://www.vista-cctv.com Description: N/A Model Number: 0,29.99.81	That server also reports: "Network Camera Web Server". Usernane Passeord Remember my credentials	The administrator's default password is 'admin'. We recommend creating a strong password to ensure the account security.
Model Url: http://www.vista-cctv.com Web Url: http://192.168.0.130:80/ P2P UID:	OK 📮 Cancel	ОК
Fig 3	Fig 4	Fig 5

Click on the monitor URL to open the web page [Fig 3]

! Important: - ensure the default browser used is Internet Explorer

Enter Username & Password [*Fig 4*] Once logged in a "message will be displayed advising to change admin password" Change if required or click OK [*Fig 5*] The main webpage will appear as shown below [*Fig 6*]

Select the Config Icon, then PVM [Fig 7] (The majority of the settings are done here)

Logo Setting page is loaded > this is where you can upload the Logo's of your choice. Select "Logo file 1 > Choose File" and browse to Logo's Select "01-01.jpg" then load any logo's if required as per [Fig 9] then select "Upload" on all 4x logo's [Fig 8], Once done "Logo List" should look like [Fig 9]

			Logo List		
			No.	File Name	
Logo Setting			1	01-01.jpg	Remove
Logo file 1	Choose File No file chosen	Upload	2	01-02.jpg	Remove
Logo file 2	Choose File No file chosen	Upload	з	01-03.jpg	Remove
Logo file 4	Choose File No file chosen	Upload	4	01-04.jpg	Remove
Logo file 5	Choose File No file chosen	Upload	5		Remove
	Fig 8			Fig 9	

Next add any "Warning Message" if required below. [Max 23x Characters]

Warning Message		
Warning Message1	Recording in Progress	
Warning Message2	Welcome	
Warning Message3		
	Apply	

Once done select Apply.

•

Now using the IR Remote press Menu > Select PVM Function

- Turn Display Message > Off/On as required
 Logo Display Mode > As required Logo or Sequence
 Sequence Sequence > Set Dwell required

- Sequence Dwell > Set Dwell required

Exit Menu > Select Setup Menu > then Camera Settings

- Set Date & Time Setting
- Set Motion Duration •

Exit when done, this completes the procedure.

For a full description of all the PVM10CAMx functions, please refer the main manual.
